Career Objective

To begin my career as a Full Stack Developer where I can apply my foundational knowledge of frontend and backend technologies to build responsive and efficient web applications. I aim to learn from real-world projects, improve my coding and problem-solving skills, and grow into a professional developer who contributes effectively to team success and continuous innovation.

Professional Summary

Motivated and detail-oriented Full Stack Developer (Fresher) with strong fundamentals in HTML, CSS, JavaScript, and backend languages like Java, C, and C++. Skilled in building responsive user interfaces, writing clean code, and solving logical problems. Completed multiple Hacker Rank certifications and developed practical projects including a responsive portfolio website. Eager to apply my skills in real-world development, learn modern technologies, and contribute effectively to team-based projects.

Skills

Frontend: HTML5, CSS3, JavaScript, Responsive Design

Backend: Java, C, C++

Tools & Other Skills: VS Code, Debugging, Problem Solving

Projects

Responsive Portfolio Website:

- Built using HTML, CSS, Java
- Designed modern UI with smooth navigation
- Implemented reusable components for clean code
- Optimized performance and accessibility
- Deployed websites for public access

Additional Mini Projects:

- Login Page UI
- Form Validation Script
- Simple Java Programs (OOP, loops, arrays)

Certifications (Hacker Rank)

- [Java \(Basic\)](#)
- [Problem Solving \(Basic\)](#)
- [Problem Solving \(Intermediate\)](#)
- [Software Engineer Intern](#)

Education

Bachelor of Computer Applications (BCA)

2025 – 2028 (Expected)

PSIT Kanpur College, Kanpur

Achievements

- Completed 4 Hacker Rank certifications
- Built and deployed a responsive portfolio website
- Practiced multiple frontend and backend mini project
